

Sheep Official USDA Compliant ID Guide

Primary ID Option: Official Scrapie Ear Tags

- Most common form of visual Official ID for sheep.
- Usually white, but can be ordered privately in different colors and customized with your farm name.
- Maine has FREE standard white scrapie tags available.

Primary ID Option: Shearwell Data 840 Visual Ear Tag

- A style of Official Scrapie Tag with the added benefit of being able to scan the chip inside the tag for easy ID and record keeping.
- Get them FREE from Maine DACF's Animal Health Program office.

2nd ID Option: 840 Microchip Non-Visual Implant

- Must be used with an Official Scrapie Tag in place.
- All chip numbers start with 840.
- Require a chip reader in order to scan and read the ID.
- These must be custom ordered. Your USDA Scrapie ID number is impeded in every chip you ordered for compliant ID.
- Microchip ID Systems, Datamars, and other manufacturers produce these chips.

Secondary ID Option: Scrapie Tattoo

- Tattoos may be used to identify animals in addition to USDA compliant permanent ID.
- Scrapie tattoos must be registered with USDA APHIS and easily readable.
- Not a recommended form of primary ID because the tattoos can be altered or fade so they cannot be read.

before the animal may be sold or leave the farm.**

Cattle Official USDA Compliant ID Guide

Primary ID Option: Official RFID Button Tags

- Most common form of visual Official ID.
- Usually yellow or white but can be ordered in a variety of custom colors from manufacturers.
- Orange button tags are reserved for Brucellosis vaccinated animals.

Primary ID Option: Official RFID Button Back Hanging Tag

- A style of Official visual RFID tag with large visible hanging front tag face to capture more information that is readable chute side
- These are popular choices among breed registry tagging systems.
- Highly customizable
- Has official US Shield on the tag to indicate this is an official form of Identification.

Secondary ID Option: Farm Tag

- Must be used with an Official RFID Tag in place.
- Custom colors and information can be put on the tag
- NOT OFFICIAL ID ALONE.
- This ID type will not have a USDA shield printed on the tag, this is an easy way to tell the tag is not considered official ID.
