

Exhibit G

Demonstration of Need

The Kibby Wind Power Project will satisfy a demonstrated need for clean, renewable energy in Maine and economic investment in Franklin County. The project will make an important contribution to the reduction in emissions of air pollutants including greenhouse gases, enhance fuel diversity and lessen reliance on imported fossil fuels, and respond directly to the economic needs of Franklin County and the people who live and work in the vicinity of the Skinner and Kibby Townships. A detailed discussion regarding these project contributions is provided in Section 2.1, Project Purpose and Need, and Section 9.2, Socioeconomics.
