

Core Building Shelf/Stack Numbering System

Footprint Type: Floor

Footprint Number: 13

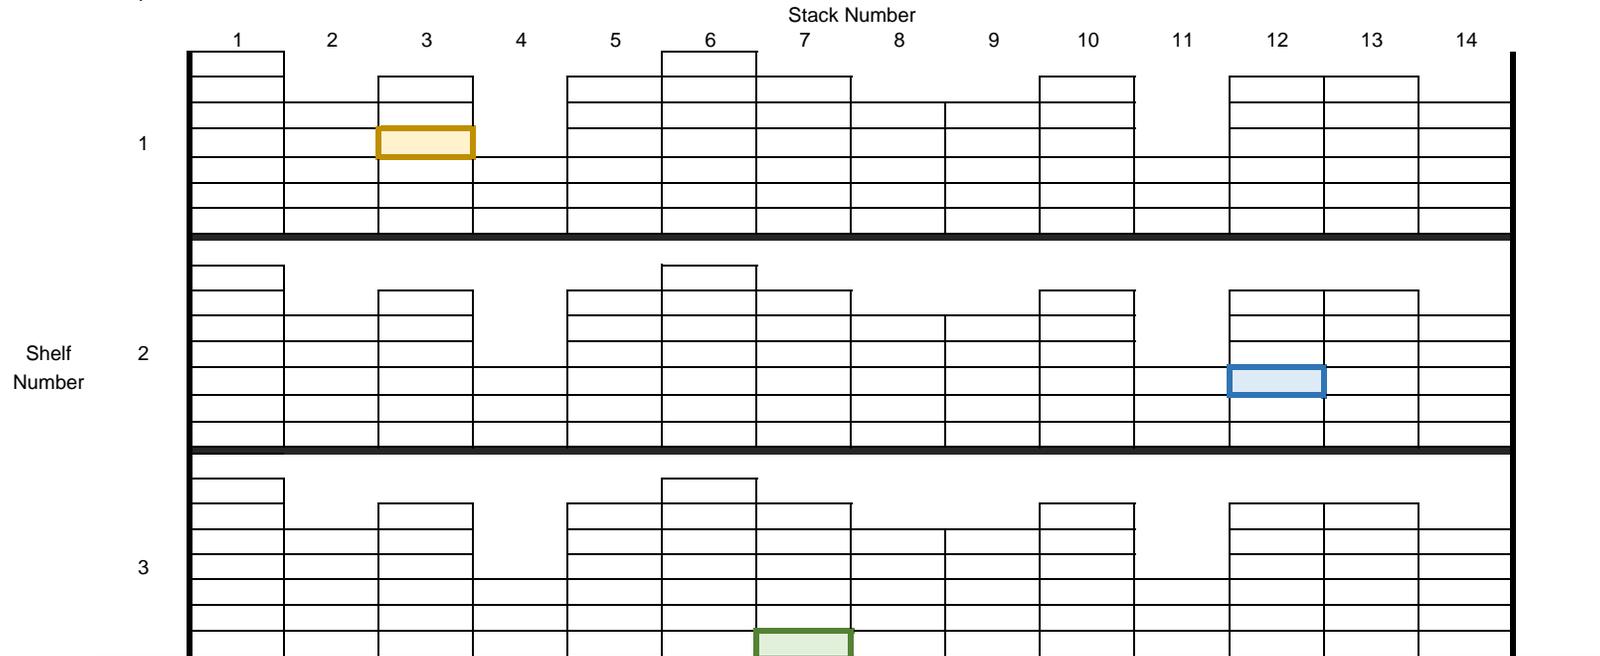

For core boxes stacked on the floor, the index number is the footprint number and the location of the box in the stack numbered down from the top down.

The red box to the left would be indexed as 13-5.

Footprint Type: Shelves

Footprint Number: 28

For core boxes stacked on shelves, the index number is the footprint number, shelf number, starting with 1 at the top, and the stack number, starting with 1 on the left and going right. The position within the stack is not referenced.

The yellow box above would be indexed as 28-1-3. The blue box above would be indexed as 28-2-12. The green box above would be referenced as 28-3-7.
