

Influenza 2017

Presentations Available

Product	Dosage	Age indication:
Fluzone	.25	6 – 35 Months
	.50	36 months and older
Flulaval	.50	6 months and older

Children under age 8 years who have never received influenza vaccine will need a booster dose no less than 28 days after the first dose of influenza vaccine.

Vaccine will be open for ordering September 5, 2017.

If you want multi-dose vials, please call vaccine management 287-3347. Supplies are limited.

Influenza vaccine ordered for the 2017/2018 season **IS** subject to replacement for preventable wastage.

Children under the age of 19 only are eligible for vaccine through the Maine Immunization Program. Repeated fraudulent administration of this public vaccine to individuals 19 years and older will result in a referral to CMS for fraud investigation.

Under Maine statute, all doses of public vaccine administered must be recorded in the Immunization Registry within five (5) working days.

Ordering guidelines:

- 2017 Provider Agreement must be active
- Temperatures and inventory reconciliation must be up to date
- Order only a supply anticipated to be utilized in the next six week time period

VFC Eligibility Screening:

This is mandatory!!! Every child, every vaccine!

- Under 19 years of age
- Medicaid
- Uninsured
- American Indian/Alaskan Native

Must be documented in the ImmPact registry.

Privately insured children do receive public vaccine; however, they must be documented as **Not VFC Eligible** in ImmPact.
