

Top Strategies for Increasing Immunization Coverage Rates

Implement one or more of the evidence-based strategies below to improve immunization coverage rates in your practice. These recommendations are also designed to complement continuous quality improvement planning.

Don't Blow Your Cover (age)

- Do you inactivate patients in the Impact who are no longer seen by your practice?
- Do you have a reminder/recall process in place for pediatric patients?
- Do you have an immunization champion at this practice that focuses on QI measures, reducing barriers and improving coverage levels?
- Do you routinely measure your clinic's immunization coverage levels and share the results with your staff?
