

Maine's Lifetime of Good Health

These are the shots your teen needs – Immunize as soon as possible!

Age	Vaccine
Ages 11 – 18	Tdap (Tetanus, Diphtheria and Pertussis) Protects against tetanus, serious breathing problems, and whooping cough
	HPV (Human Papillomavirus) Protects against cervical and other cancers
	Hep A (Hepatitis A) Protects against hepatitis A, a liver disease
	MCV4 (Meningococcal Conjugate) Protects against meningitis, an infection of the brain & spinal cord
	HepB (Hepatitis B) Protects against hepatitis B, a liver disease
	Influenza (Flu) Protects against serious respiratory disease
	MenB (Meningococcal Group B) Protects against meningitis, an infection of the brain & spinal cord

- Please speak with your health care provider to see if your teen needs additional shots.
- Influenza recommendations change frequently; please contact your healthcare provider to see if your teen needs influenza vaccine.
